and published by him for Indian Documentation Service, Gurgaon.

## PREFACE

The *Guide to Indian Periodical Literature* is a cumulative subject-author index to articles from about 140 selected Indian periodicals in Social Sciences and Humanities.

The *Guide* was launched in 1964 and its first few issues were compiled according to the Dewey Decimal Classification system. We, however, looked for a mode of compilation affording greatest ease in consultation to the ordinary reader, when Shri C.R. Banerjee, Deputy Librarian, National Library of India, came to our rescue and counselled us to adopt the dictionary method of compilation. Our thanks to him for his advice.

The next few issues were compiled on the dictionary pattern according to the U.S. Library of Congress Subject Headings, the author and subject entries being arranged in one alphabetical order. The *Guide* could not, however, be continued beyond eight monthly issues till January 1967 when its publication was resumed as a quarterly with annual cumulation. The cumulative volumes for 1964, 1965 and 1967 have already been published.

The publishing of the *Guide* has been taken over from Prabhu Book Service by our new company *Indian Documentation Service*. IDS will devote itself exclusively to the compiling and publishing of Indian bibliographical literature, under whose imprint this volume is being published.

We wish to acknowledge our particular indebtedness to several librarians for their helpful suggestions for improvement.

## PREFACE

This book is intended for students of the history of the United States, and for those who are interested in the development of the American people. It is a history of the United States from the first settlement to the present time.

The history of the United States is a story of the growth of a nation from a small group of settlers to a great power. It is a story of the struggles of the people to secure their rights and liberties, and of the efforts of the government to maintain order and justice. The history of the United States is a story of the triumph of the American people over all their enemies.

The history of the United States is a story of the growth of a nation from a small group of settlers to a great power. It is a story of the struggles of the people to secure their rights and liberties, and of the efforts of the government to maintain order and justice. The history of the United States is a story of the triumph of the American people over all their enemies.

The history of the United States is a story of the growth of a nation from a small group of settlers to a great power. It is a story of the struggles of the people to secure their rights and liberties, and of the efforts of the government to maintain order and justice. The history of the United States is a story of the triumph of the American people over all their enemies.

The history of the United States is a story of the growth of a nation from a small group of settlers to a great power. It is a story of the struggles of the people to secure their rights and liberties, and of the efforts of the government to maintain order and justice. The history of the United States is a story of the triumph of the American people over all their enemies.

## HOW TO USE THE GUIDE TO INDIAN PERIODICAL LITERATURE

The Guide is a subject-author index to articles and other reading material appearing in about 140 Indian journals in the fields of Social Sciences and Humanities. The entries have been arranged alphabetically on the dictionary pattern.

### Heading :

Whenever possible, entries are made under "subject" headings e.g. Agriculture, Architecture, Community development, Folklore. Under geographic headings will be found, usually, material on the government, general defences, economic conditions, politics and social conditions etc. of the country, i.e. material too broad to be classified under subject headings. Entries are made under the most specific heading e.g., material on Jute has been listed under "Jute" or 'Jute industry and trade' and not under 'Fibres', except where the amount of material is too small or where it is advantageous to collect related material under a single heading. Single short stories, dramas etc. have been listed under the names of their authors with cross references from their title entries.

### Sub-Divisions :

Headings are subdivided whenever the amount of material entered there warrants it and the nature of the material permits it. The two types of subdivisions used in the Guide are (i) subheads (set in bold face type) and (ii) second subheads (set in light face italics). These subheads are also arranged in alphabetical order. Exceptions have been made in the case of headings which have been subdivided by general subheads as well as geographically in which case general subheads precede the geographical subheads. Thus Education—Standards will precede Education—India. Second subheads are also arranged alphabetically under the first subheads.

**Alphabetization :**

Headings are alphabetized on the word by word basis. Inverted headings precede uninverted headings. Abbreviated headings viz., AIR appear at the beginning of each alphabet.

**Inversions :**

Multiple-word headings are inverted if a word other than the first is deemed to be the "key word" in identifying the heading (e.g. articles on American economic assistance are listed under 'Economic assistance, American', and not under 'American economic assistance').

**Entries :**

There are at least two entries for each article—an author entry and a subject entry except where there is no author. Additional subject entries have been made wherever the articles deal with more than one subject. The entries under subject headings are also arranged alphabetically.

**Bibliographic Data :**

Each entry starts with the title of the article followed by the name of the author (where there is any), the abbreviated title of the journal, volume and issue number, page numbers and other information such as illustrations, bibliography etc. A plus (+) sign following the page number indicates that the article has been carried over to some other page in the same issue. Explanations of other abbreviations used in the Guide have been given under "Abbreviations and Signs". A sample entry given under "Abbreviations & Signs" will illustrate the above procedure.

**Cross-References :**

All related headings are covered by cross-references or by duplicate entries. While a 'See also' reference draws attention of the readers to related subject headings which they might usefully look up, a 'See' reference indicates that entries have been listed under the subject heading to which the reference has been drawn.

### Sample entry :

#### CULTURE

The cultural explosion. James B. Klee *Darshana int*  
5(1) Ja'65 63-78

### Explanation

An article on the subject CULTURE entitled 'The cultural explosion' by James B. Klee will be found in Volume 5, Number 1, January 1965 issue of *Darshana International* at pages 63-78

As article on the subject CULTURE and the  
 cultural criticism by James E. Ellis will be found in  
 Volume 5 Number 1, January 1914, pages 25-32

Explanation

The current edition James E. Ellis
